Phone us on **0845 130 5140** if you want to know more about how we can help you build a SCORM training system fit for the future.

## Build and futureproof using SCORM

SCORM

Historically, the e-learning industry has been overrun with unique solutions to training that are all independent of one another. The advent of SCORM has spawned platforms and content that are interoperable; learning has become global.

By employing this international standard, Absolutely Training can guarantee a solution that meets the most unique of specifications.

### What is SCORM?

Shareable Content Object Reference Model (SCORM) was developed as a fundamental technical specification for e-learning and governs content delivery and platform specifications. You have the freedom of choosing web-based training from a variety of sources and the ability to host them in one location. By ensuring that your training is SCORM compliant, your training is at the forefront of emerging learning technologies.

We are able to offer four defined SCORM usage options:

### 1) Host your courses on an ATL SCORM Compliant LMS

We can take your existing bespoke material and transform it into a course that sits on our SCORM compliant platform. Your course now conforms to a recognised benchmark standard within the industry.

### 2) Host your courses on your own platform

If you've recently purchased your own SCORM compliant LMS, but have content that pre-dates SCORM technology, we can convert all of your content into a SCORM compliant format. Your existing material can then be seamlessly uploaded onto your SCORM platform. This ensures that you save on re-development time and costs.

### 3) Host ATL SCORM Compliant courses on your platform

Perhaps you've already purchased an LMS, but don't have your own courseware. Our library of courses is available in SCORM compliant format, as is any bespoke development that we create for you. This is easily uploaded onto your existing platform.

### 4) Host ATL SCORM Compliant courses on an ATL SCORM Compliant LMS

Perhaps you don't have a SCORM compliant LMS or courseware, but you still worry that any investments you make into online training will be wasted as SCORM compliance gathers momentum. We can create content for you that is SCORM Compliant and sits on our SCORM Compliant LMS. If you decide to purchase your own SCORM LMS in the future, Absolutely Training can transfer your data effortlessly onto your LMS.
